SKILLS

- **Frontend**: Next.js, React.js, JavaScript, Redux, Microfrontend, React Native, Jest, HTML, CSS, Material UI, Tailwind CSS.
- **Backend**: Node.js, Nest.js, Express.js, TypeScript, RabbitMQ, FastAPI, gRPC, GraphQL, RAG, LangChain & LangGraph, AWS
- **Database**: MySQL, MongoDB, DocumentDB

EXPERIENCE

Publicis Sapient *(Experience Engineer L2)* Gurugram, Haryana *July 2025 - Present*
React.js, Next.js, Python, FastAPI, MongoDB, gRPC

- Implemented asynchronous PDF generation workflows using Puppeteer, integrating distributed **worker services**, background job processing and real-time job tracking using **Amazon SQS** for scalable generation, and delivery of portfolio analysis reports.
- Integrated **gRPC-based** backend communication to efficiently handle data retrieval from other services, resulting in **77% lower latency and over 400% higher throughput.**
- Built AI-powered chatbot capabilities using **LangChain** and LLM integrations to support conversational financial and portfolio-related query workflows.
- Developed and maintained the portfolio analytics tool's UI using **React.js** and **Next.js**, leveraging **Material UI** for design, **Redux Toolkit** for state management, and **Tailwind CSS** for custom component styling.
- Utilize **AWS CloudWatch** extensively for application monitoring, logging, and observability, alongside AWS services for deployment, infrastructure, and GenAI solutions with **Amazon Bedrock**.

Real time data services *(Software developer)* Gurugram, Haryana *December 2022 - May 2025*
Next.js, React.js, Nest.js, Node.js, Microservices, Redux, MongoDB, React Native

- Implemented RBAC(Role-Based Access Control) in public cloud portal to enhance security and scalability, fulfilling the requirement of nearly **80%** users.
- Developed a user-friendly interface in **Next.js**(v14) for Kubernetes-as-a-service using rancher and Database-as-a-service using kubeDB.
- Built a SaaS application for Identity and Access Management (IAM) leveraging a **microservices architecture** and **microfrontend**, through **React.js**, **Node.js**, **MongoDB**, **Webpack**, and **RabbitMQ** for inter-service communication, incorporating features like **single sign-on (SSO)**, **multi-factor authentication (MFA)**, and **password-less login**.
- Designed a **push notification** application in **React Native** enabling authentication through registered mobile devices and eliminating password dependency, adopted by 90% of users.
- Architected a secure and seamless **reseller portal** for **MSSPs**, enabling resellers to sell software and facilitating efficient communication with the sales team.

PROJECTS

builder.AI *Reactjs, Nestjs, WebContainer, OpenAI* **Frontend Backend**

- Implemented an AI-driven code generation tool that dynamically creates both frontend (**React.js**) and backend (**Node.js**) code based on user prompts using **OpenAI APIs**.
- Built a robust backend with **NestJS** to handle API requests, process user inputs, and interact with OpenAI APIs for generating code.
- Integrated **WebContainer** technology to render and execute both frontend and backend code directly in the browser, providing instant previews of the generated designs.
- Implemented a feature to download the entire project as a zip file, allowing users to easily obtain the generated code for local development.

Snacks bar *Android, XML, MVVM* **GitHub**

- Developed a food delivery Android application using **Kotlin, XML, and MVVM architecture**, achieving **100+ downloads** within the first month of release.
- Integrated **Firebase Cloud Messaging and Room Database** for push notifications, local cart persistence, and optimized application performance.

ACHIEVEMENTS

- Scored **Rank 1** / 1,112 in CodeStudio weekly contest 42
- Consistently contribute technical insights through **blog** posts on **GeeksforGeeks**. Check out my profile here.
- Solved **1000+** problems in Leetcode, GFG, HackerRank, etc. Achieved a **Top scorer** on GFG in my institute.

EDUCATION

Bachelors of technology **New Delhi, India** *August 2019 - June 2023*

- Guru Tegh Bahadur Institute of technology ▪ Major in Computer Science and Engineering ▪ 9.065
